Next Generation Slim Solution

Riboflavin + Bromelain + Lecithin

WHAT IS CITRUS BOTTLE™

Introducing the Citrus Bottle:

A Pioneering Solution in Fat Cell Metabolism Enhancement.

In the quest for a healthier, more vibrant you, the Citrus Bottle emerges as a groundbreaking solution, revolutionizing the approach to managing stubborn fat cells. Crafted with a pioneering spirit, the Citrus Bottle stands at the forefront of fat cell metabolism technology, offering a premium, high-concentration solution that is unrivaled in both efficacy and quality.

At the heart of Citrus Bottle's remarkable formula is a potent blend of key ingredients, including Riboflavin (Vitamin B2), Lecithin, and Bromelain. This unique concoction is engineered to significantly enhance the metabolism of fat cells and accelerate lipolysis, the process of fat cell breakdown.

**RIBOFLAVIN
(VITAMIN B2)**

BROMELAIN

LECITHIN

MECHANISM OF CITRUS BOTTLE™

01

Metabolic Activation with Riboflavin

- Riboflavin enhances the body's metabolism, particularly targeting fat cells for more efficient breakdown and energy conversion, leading to an accelerated fat reduction process.

02

Isolation and Removal of Fat Cells

- The treatment targets and isolates fat cells, facilitating their natural expulsion from the body, making it especially effective for stubborn fat areas.

03

Quick Lipase Activity and Reduced Inflammation

- It boosts lipase enzyme activity for faster fat cell breakdown while simultaneously mitigating inflammation to ease recovery and enhance comfort.

04

Skin Health Improvement

- Alongside fat reduction, it promotes better skin health, contributing to firmer, more elastic skin by supporting collagen production and hydration.

HOW CITRUS BOTTLE™ TREATMENT WORKS

01

Riboflavin induces activation of fat metabolism.

02

Lecithin destroys and transports unnecessary fat cells.

03

Bromelain helps to break down fat and remove inflammation.

Adipose Tissue

Adipocytes (White adipose cells)

MAIN INGREDIENTS

WHAT IS RIBOFLAVIN (VITAMIN B2)

Riboflavin, also known as vitamin B2, is a water-soluble vitamin that plays an essential role in human health. It is crucial for the body's energy production, aiding in the metabolism of fats, carbohydrates, and proteins. Notably, riboflavin imparts a bright yellow color to vitamin supplements and foods high in this nutrient, contributing to the yellowish tint observed in some fortified foods and drinks. Given its water solubility and sensitivity to light, it's important to store riboflavin-rich foods properly to prevent degradation.

What does Riboflavin do?

Riboflavin serves multiple vital functions within the body. Riboflavin is a key component of coenzymes involved with the growth of cells, energy production, and the breakdown of fats, steroids, and medications.

Riboflavin's other specific roles include:

- It serves as a catalyst and participates in the breakdown of fats, acting as a coenzyme in various oxidation and reduction reactions within the tissue.
- Riboflavin is instrumental in converting amino acids and fatty acids into energy, facilitating efficient energy production within the body.
- Necessary for the growth, development, and functioning of body cells, riboflavin is vital for overall cellular health.
- It plays a crucial role in maintaining healthy skin and mucous membranes, contributing to the integrity and function of these tissues.
- Regular intake of riboflavin is important to prevent deficiencies, which can lead to skin disorders, hair loss, itchy and red eyes, and sensitivity to light, emphasizing the need for a riboflavin-rich diet to maintain these vital bodily functions.

MAIN INGREDIENTS

WHAT IS BROMELAIN (ANANAS SATIVUS)

Bromelain is a complex mixture of substances extracted from the pineapple plant (*Ananas comosus*), primarily found in the fruit, stem, and juice. It is a group of enzymes that have been used for centuries in traditional medicine.

Bromelain's other specific roles include:

■ Promotes Weight Loss

By improving digestion and potentially boosting metabolism, bromelain may help in weight management.

■ Aids in Digestion

Bromelain is effective at breaking down proteins into smaller peptides and amino acids, facilitating smoother digestion and nutrient absorption.

■ Alleviates Muscle Soreness

By reducing inflammation, bromelain can help alleviate muscle soreness post-exercise, speeding up recovery.

■ Supports Immune Function

Some research suggests that bromelain can enhance the body's immune response, although the specifics of this effect are still being studied.

■ Prevents Blood Clots

Its anticoagulant properties may help prevent blood clot formation, promoting cardiovascular health.

MAIN INGREDIENTS

WHAT IS LECITHIN

Lecithin is a generic term to designate any group of yellow-brownish fatty substances occurring in animal and plant tissues, which are amphiphilic - they attract both water and fatty substances (and so are both hydrophilic and lipophilic), and are used for smoothing food textures, emulsifying, homogenizing liquid mixtures, and as a repellant in medical and cosmetic applications. Lecithin can be extracted from sources like soybeans, egg yolks, and sunflower seeds, making it widely available for various uses in the food, pharmaceutical, and cosmetic industries.

Lecithin's other specific roles include:

■ Facilitates Fat Breakdown

In the human body, lecithin aids in the breakdown and distribution of fats, supporting liver health and preventing fatty liver disease.

■ Cell Membrane Structure

Essential for the structure and function of cell membranes, ensuring proper cell function and nutrient transport.

■ Nutrient and Waste Transport

Facilitates the movement of nutrients into cells and waste products out of cells, crucial for healthy metabolic processes.

■ Cosmetic Applications

Used in cosmetic products to blend ingredients effectively, improving the texture and application of skincare and makeup products.

CITRUS BOTTLE™

VS OTHER PPC PRODUCTS

In the innovative landscape of body sculpting and weight management, Citrus Bottle™ emerges as a trailblazer, redefining the approach to non-invasive fat reduction. Citrus Bottle™ offers a sophisticated solution for those seeking to diminish stubborn fat deposits without the complications of surgical procedures. Here's why Citrus Bottle™ is the standout choice for your fat reduction needs, distinctly positioned in market.

PPC PRODUCTS

ADVANCED FORMULATION

Mainly rely on Phosphatidylcholine, with less emphasis on other enhancing agents.

TARGETED FAT REDUCTION

Effectively target fat, but results vary with technique and formulation.

ENHANCED EFFICACY

Effectiveness depends on PPC concentration and treated area.

SAFETY PROFILE

Documented safety, but carries risks like swelling and bruising.

EASE OF USE

Administered by professionals, requiring clinic visits.

COST-EFFECTIVE

Evaluated on treatment cost, number of sessions, and result longevity.

CITRUS BOTTLE™

Uses a unique ingredient mix for better fat breakdown.

Can precisely target and reduce fat in specific areas.

Offers faster and more significant fat reduction.

Fewer side effects and broader user acceptance.

Simpler application, possibly requiring fewer treatments.

Better results or safety at a lower cost, potentially needing fewer sessions.

FACE

CITRUS BOTTLE

Recommended for:

- Poor facial lines due to lost elasticity
- Facial asymmetry correction
- Thick double chin
- Large cheekbones

INDICATIONS

TREATMENT AREA	Jawline, Double chin
NEEDLE	30G~32G is recommended
USAGE PER POINT	10~20cc
POINT INTERVAL	0.5~1.0cm
MAXIMUM FACE USAGE	Up to 20cc
NUMBER OF POINT	20~25 points

Total usage volume

JAWLINE	10~20cc
DOUBLE CHIN	10~20cc

No. of sessions

Typically requires 3 to 5 sessions spaced 2 to 4 weeks apart, depending on the the amount of fat in the treated area.

JAWLINE

Point: 4 / 1cm interval

DOUBLE CHIN

Point: 5~8 / Usage: 10~20ml

BODY

CITRUS BOTTLE

INDICATIONS

TREATMENT AREA	Body
NEEDLE	Cannula or 30G is recommended
USAGE PER POINT	1.5~2cc
DOSAGE OF POINT	1.0~2.0cc
DEPTH	6~12cc
POINT INTERVAL	1.5~2.0cm(In case of using 30G)
NUMBER OF POINT	30~70 points

Total usage volume

ARMS (BOTH SIDE)	10~20cc
LOVE HANDLE (BOTH SIDE)	20~30cc
INNER THIGH (BOTH SIDE)	20~30cc
ABDOMEN (BOTH SIDE)	20~30cc

No. of sessions

Typically requires 3 to 5 sessions spaced 2 to 4 weeks apart, depending on the the amount of fat in the treated area.

How to use

To minimize needle pain, we recommend spacing out the injections more widely. Remember not to administer more than 100cc across the entire body in a single session. The total volume of the injection is distributed across various injection sites. For instance, if you're injecting 30~40ml into the abdomen and have 8 injection points, each point will receive approximately 4~5ml. It's crucial to ensure each site receives enough of the injection.

INJECTION RECOMMENDATIONS FOR OPTIMAL RESULTS

Before treatment

- Use at least the prescribed dosage.
- Avoid administering in small amounts as in Mesotherapy.
- Do not mix with other substances, such as saline solution.

After treatment

- Stay hydrated by drinking plenty of water.
- Avoid eating meals late at night.
- Engage in light exercise and massage.
- Initially, for the first 2 to 3 days, consider not using a hot towel or visiting a sauna.

Cautions

- Store the products at room temperature.
- Avoid applying near the eye area.
- Use the ampoule immediately after opening.
- The product is for single use only and must not be reused.

How many sessions are required

We recommend you make a 3~4 times of treatment program(total 1 month) for the patients.

For example:	1st treatment January 1st	>	2nd treatment January 11st	>	3rd treatment January 21st	>	4th treatment January 31st
--------------	------------------------------	---	-------------------------------	---	-------------------------------	---	-------------------------------

If your patients(or their doctors) feel that four treatments a month are too frequent, consider suggesting a bi-monthly schedule. In our experience, two treatments per month typically yield excellent results for patients who are not severely obese.

SPECIFICATIONS OF CITRUS BOTTLE™

PRODUCTS NAME

Citrus Bottle

INTENED USE

Slim solution for face & body

PACKING UNIT

10ml X 5ea

COMPOSITION

Riboflavin, Bromelain, Lecithin, Cyanocobalamin, Ananas Sativus(Pineapple) Fruit Extract, Chamomilla Recutita(Matricaria) Extract, Salvia Miltiorrhiza Root Extract, Scutellaria Bai calensis Root Extract, Centella Asiatica Extract, Pentylene Glycol, Sodium Chloride, 1,2-Hexanediol, Papain, Acetyl Hexapeptide-8, Palmitoyl Pentapeptide-4, Palmitoyl Tetra peptide-7, Ascorbic Acid, Glutathione, Adenosine, Carnitine, Arginine, Water
