réluma

glisse

Ultra-soft, highly malleable gel with excellent stretchability, designed to smooth fine lines on the face, neck, and décolleté

Réjour Glisse is lightweight hyaluronic acid filler is ideal for superficial wrinkles, offering seamless integration into delicate areas without adding excessive volume. Its low viscosity and high flexibility ensure natural-looking results in areas such as:

Perioral lines (fine lines around the mouth)

Necklines (horizontal neck wrinkles)

Décolleté wrinkles

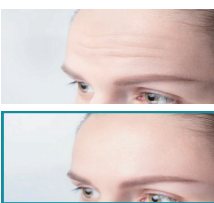

Crow's feet (fine lines around the eyes)

réluma

lush

A medium-density, elastic gel designed to fill moderate to deep wrinkles while restoring natural volume and definition

Réjour Lush is a resilient hyaluronic acid filler specifically formulated for dynamic areas like the lips and perioral region. It offers flexibility and adapts to facial movements, making it well-suited for natural-looking enhancement in areas such as:

Lip augmentation (adding volume and shape)

Forehead and glabellar fine lines

Nasolabial folds (smile lines)

Oral commissures (corners of the mouth)

Marionette lines

réluma

volumie

A high-viscosity hyaluronic acid filler designed for deep wrinkles, facial contouring, and volume restoration

Réjour Volumie has dense and cohesive structure that provides long-lasting support and definition, making it ideal for enhancing facial contours, jawline sculpting, and deep nasolabial folds. It integrates smoothly while maintaining shape and durability in areas such as:

Jawline sculpting

Chin augmentation

Cheekbone enhancement

Deep nasolabial folds

réluma

implant

Ultra-high viscosity hyaluronic acid filler designed for deep volume restoration and structural augmentation

Réjour Implant features a highly cross-linked hyaluronic acid formulation, ensuring exceptional durability and stability. Its dense and cohesive structure provides long-lasting support and definition, making it ideal for sculpting and enhancing facial features in areas such as:

Jawline contouring (enhances sharpness)

Chin augmentation (provides structure)

Chin enhancement (volume and lift)

Non-surgical rhinoplasty (nose shaping)
